SUMMARY

Full Stack Software Engineer with 5+ years building production web and mobile applications using React, TypeScript, Node.js, and cloud infrastructure. Experienced integrating AI and LLM-powered features into business workflows, building automation pipelines, and deploying scalable full stack platforms

WORK EXPERIENCE

Eutopis

Software Engineer

Toronto, ON

October 2022 – Present

- Developed reusable frontend components using React and React Native to support production user-facing application features
- Implemented shared UI utilities and helper libraries in TypeScript to improve code reuse and developer productivity
- Integrated REST and GraphQL APIs using Node.js backend services to enable scalable data-driven application functionality
- Diagnosed and resolved production defects through debugging and monitoring tools to improve application stability and user experience

Code Ninjas

Programming Instructor

Toronto, ON

January 2021 - January 2023

- Taught foundational programming concepts including JavaScript, TypeScript, and C# to students across multiple experience levels
- Mentored students in debugging, algorithmic thinking, and software design principles through project-based learning
- Improved student understanding of programming fundamentals through structured curriculum delivery and individualized technical feedback

EternalRage.net

Full Stack Developer

Toronto, ON

June 2021 – September 2022

- Built responsive user interfaces using React and Material UI to improve usability and accessibility across devices
- Developed full stack application logic using TypeScript across frontend and backend services to improve client-server data flow performance
- Implemented automated testing and debugging workflows to increase code reliability and reduce production defects

EDUCATION

Toronto Metropolitan University

Bachelor of Science in Biomedical Engineering

Toronto, ON

TECHNICAL SKILLS

Languages: Typescript, Javascript, Python, C++

Frontend: React, React Native, NextJS, Redux, HTML, CSS

Backend: NodeJS, Express, GraphQL, REST API, Webhooks, Microservices, MongoDB, SQL

AI/Automation: LLM API Integration, Generative AI Pipelines, ComfyUI Workflows, Ai Image and Video Generation Pipelines, LoRA/Model Integration, n8n Automation, Event-Driven AI Workflows, Business AI Integrations
